

Air Pressurizer Kit

For Cat® C, D Series SSL/MTL/CTL

Supertrak is proud to offer an Industry First Air Pressurizer Kit for your Caterpillar® C-Series Models. The Air Pressurizer Kits reduces the amount of dust and debris that enters the cab by introducing filtered fresh air while operating in severe dusty environments such as applications like Forestry, Grading, or Recycling.

The Air Pressurizer Kit is a bolt on option to the top of the cab when height limitation is not required.
